About Navayuga Engineering Company Ltd

Navayuga Engineering Company Limited (NEC) is a leading player in engineering and infrastructure, delivering impactful projects across India and internationally.

With a vision to transform landscapes through innovation, NEC combines cutting-edge technology and expertise to redefine growth, making a significant mark on global infrastructure

The Challenges

Before implementing Xpedeon ERP, Navayuga was working with a mix of standalone systems that came with certain operational constraints:

- Fragmented tools made interdepartmental coordination less streamlined.
- Manual processes for contracts and budgets occasionally led to slower turnaround times.
- Limited real-time visibility into financials and project data influenced the speed of decision-making.
- Project management and financial workflows were not fully connected.
- Supporting growth required more cohesive and centralized systems.

Why Xpedeon?

Navayuga selected Xpedeon ERP to bring together critical functions under one integrated platform:

▼ A unified system to manage procurement, contracts, budgeting, and planning.

▼ Real-time data and reporting supported more agile, informed decision-making.

▼ Purpose-built modules aligned with core operational needs, helping simplify day-to-day activities.

▼ The platform provided a stable and scalable foundation to support ongoing growth.

Modules Implemented

Procurement

Inventory

Subcontracting

Financial Accounting

Budgets & CVR

Contract Management

The Value Delivered

- Improved interdepartmental coordination eliminated silos and enhanced collaboration.
- Real-time data visibility supported faster, data-driven decision-making.
- Streamlined processes saved time and reduced operational inefficiencies.
- Clear insights into budgets and expenses ensured better cost control and project profitability.
- Automation minimised errors and freed teams to focus on critical project goals.
- Comprehensive reports provided a detailed view of financial and project performance.
- Scalable and integrated systems enabled smooth operations as the company grew.

The Xpedeon Advantage

Scalability	Visibility	Integration	Cost control

What They're Saying

"Since adopting Xpedeon ERP, we've experienced a noticeable improvement in how our teams collaborate across departments. Integrating procurement, inventory, and financials into a single platform has saved time and streamlined our processes. The ability to access real-time data has helped us make quicker, more confident decisions. With better visibility into our spending, we've also achieved greater control over costs. Xpedeon has supported our efforts to grow efficiently and with stronger operational oversight."
